

ARCH565 | WEEK SIX
KYLER OSTER

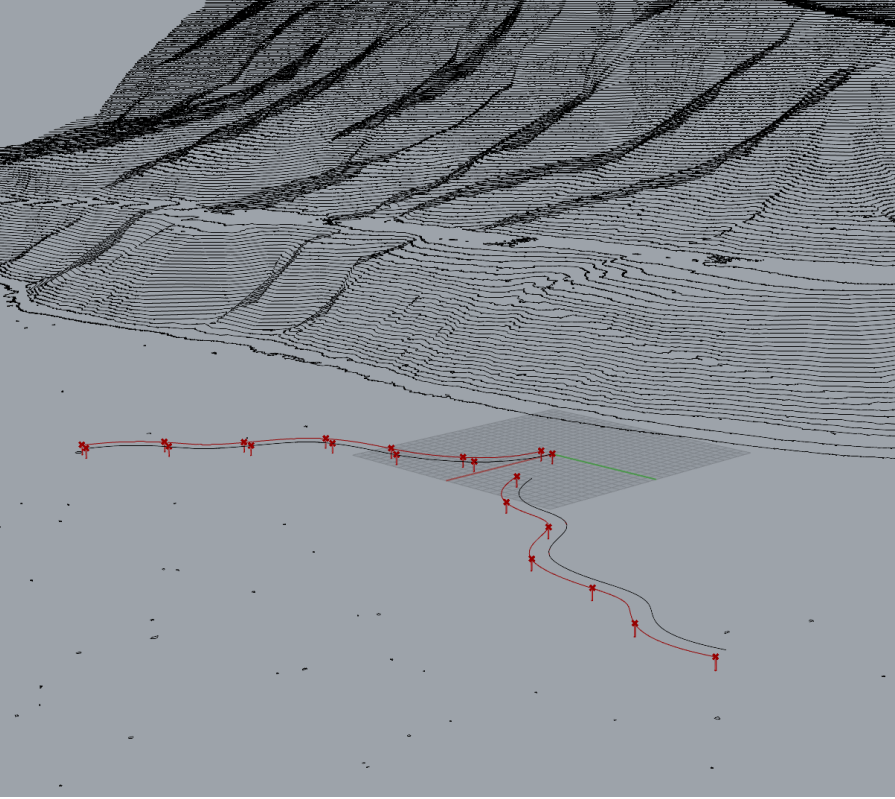

I am having difficulties with Rhino.Inside to get the revit linked. Every time I open Revit and try to start Rhiono.Inside, I get an error and Re- vit crashes. I reached out to support and am waiting to hear back. I have a prelim layout for the boardwalk that connects to the beach. Tried adding columns in with grasshopper, but I think Revit will be easier! I'm looking at doing a glulam gridshell with semi transparent poly- carbonate panels for the roof of the bunga- lows.

Generated Precedence

I do like how these roof structures look but give it my own style and design

...These are going to look crazy in Unreal!
